1

CONNECT

The current modem will not be replaced and will provide phone service, the new modem will be added and provide internet service. Unplug Ethernet cable from the current modem and plug it in to the new modem.

2

ACTIVATE

Online Flashing = Wait

Online Steady = Ready

Wait for the online connection light on the front of the modem (may be labeled: Online, Sync, Cable or Ready) to stop flashing and remain lit. Once the light is solid, open up a web browser.

To activate your service

A registration page will appear, use the account number from a monthly statement to complete the activation process.
